Manchester NW-1

Pulsant's NW-1 facility, situated in the UK's second-largest city, is a resilient and accredited data centre with access to over 10 on-site connectivity partners. Following a recent multi-million pound investment, the site offers excellent access to road and rail networks and is just 10 miles from Manchester Airport. Flexible colocation options include high-density racks, full, half, and quarter racks, as well as private cages.

NW-1 is part of Pulsant's network of 12 interconnected UK data centres, connected via the Pulsant Edge Fabric, a 100Gb national network for low-latency access to 1,600+ cloud services, network providers, and business partners.

Experience seamless, high-speed, and secure UK-sovereign connectivity with LINX and Pulsant. Our powerful partnership connects all three LINX regions through a private, ultra-reliable network, delivering faster access to digital services from any Pulsant data centre via our national Edge Fabric. Whether you're inside or outside a LINX region, unlock new opportunities and accelerate your business with unmatched connectivity and performance.

LINX Scotland hosted at Pulsant SC-1

Keeping internet traffic local in Scotland

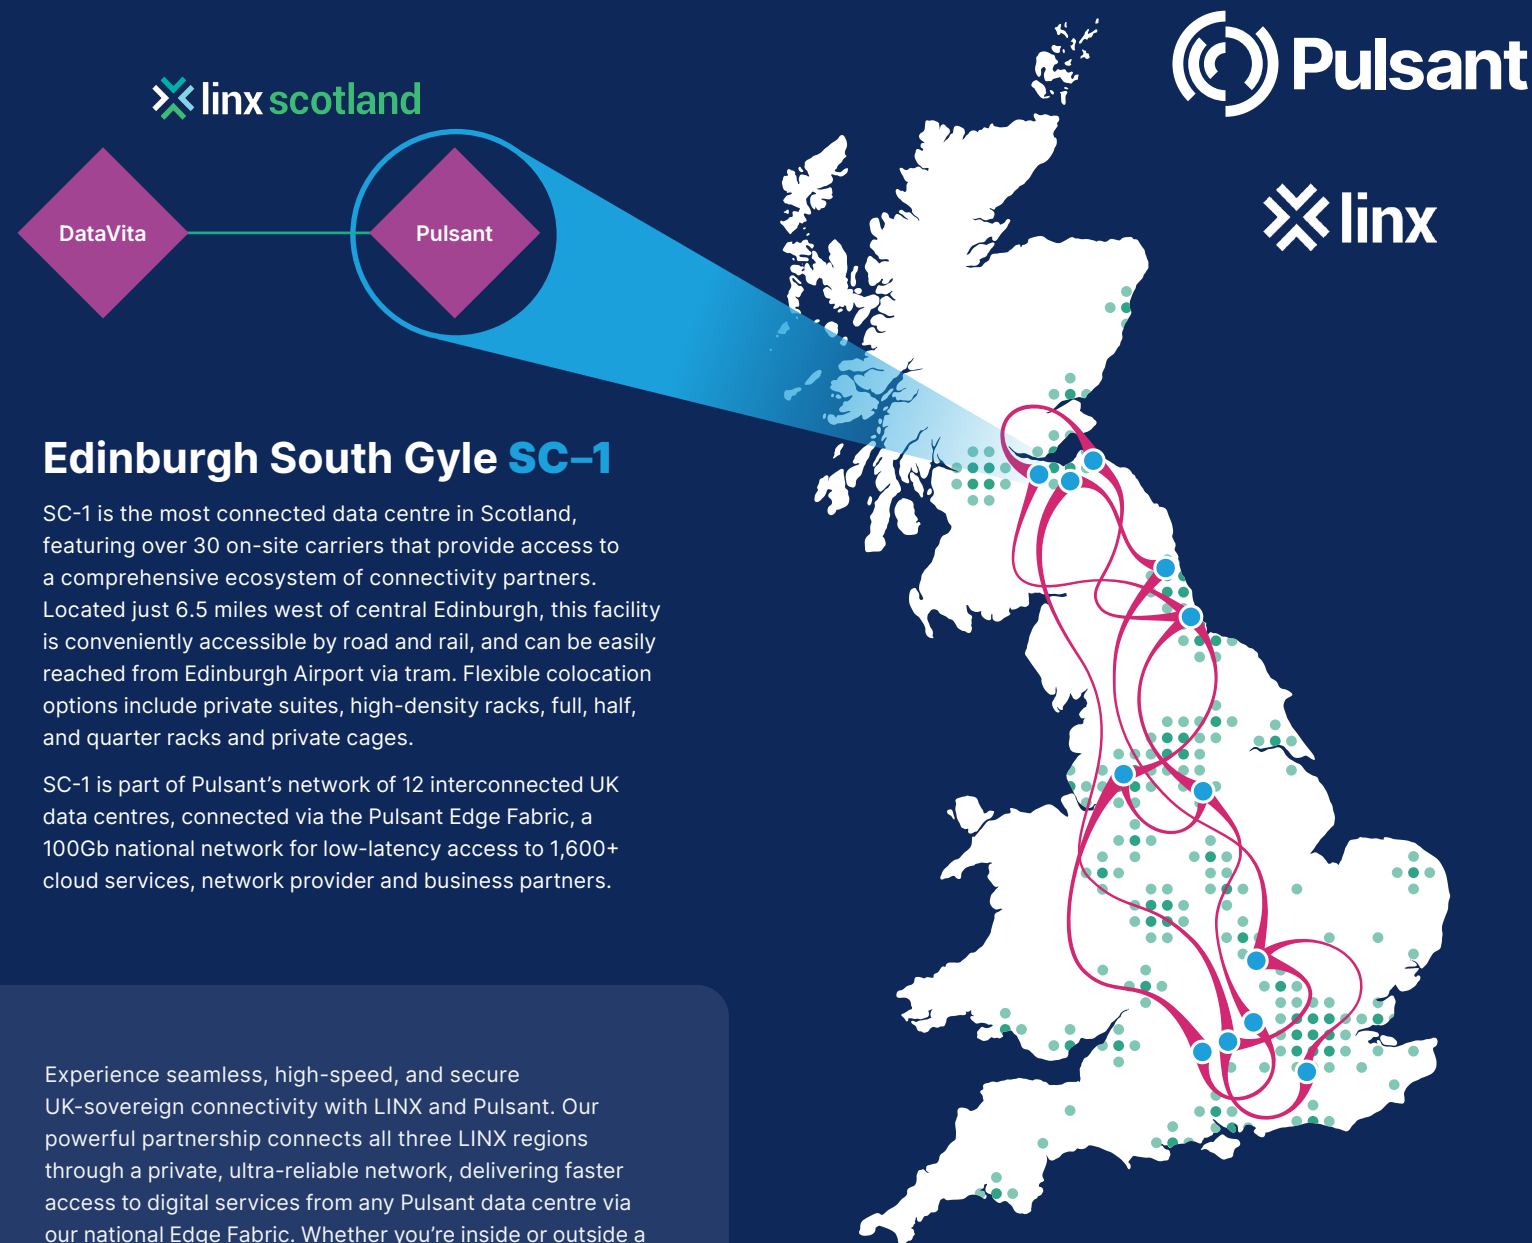

Home to some of the fastest-growing centres of culture, technology and finance excellence in the UK, Scotland deserves better ways to transfer internet traffic. And that's exactly what LINX Scotland provides.

LINX Scotland offers peering and interconnectivity services that deliver cost effective, more resilient ways to transfer data to and from Scottish organisations. Join a mutual non-profit interconnectivity provider that can help you achieve cost effective, low-risk data transfer – while keeping your traffic local.

Why Peer at LINX Scotland?

- Keep traffic local to Scotland for improved performance, low latency
- Increased control of network traffic over a resilient and redundant platform
- Peering services and more including private VLANs and Closed User Group solutions
- Meet all networks on the LINX Scotland fabric to pass traffic, via a single cross connect
- 10G port and 2Gbps service included in the LINX monthly membership fee of £100
